

MINI-CROSKILL ROLPAF 410

DOUBLE ROTO-HARROW Ø300

COMDOR P

COMDOR P combines a succession of tool trains, giving it perfect technical expertise for creating seedbeds in a single pass - an important condition for rapid emergence, but also a guarantee of profitability.

BENEFITS

- . 3 point floating and ROLNEC 500/11 rollers for optimum levelling and tracking of worked ground.
- . Optional hydraulically adjustable levelling board for increased flow.
- . Precise parallelogram adjustment of working depth.
- . Mini croskill rolpaf 410 with integral elements mounted floating for perfect consolidation of the seedbed and calibration of clods.
- . High protection 40 mm bearings.

Description

COMDOR P is characterised by its short length, but also by its ability to work efficiently on all types of soil. It is recommended for preparation work on small plots and for medium-power tractors. COMDOR P can be fitted with two types of tines and finishings that can be quickly removed for preliminary work. Exceptional levelling and easy-to-operate adjustment of active components, homogeneous seedbed with no dry areas and stable depth. Optimum compaction with very good referencing for high-precision seeding, enabling fast, regular emergence. Double the productivity of an animated tool. Highly versatile and modular thanks to the different types of tines available.

Active organs

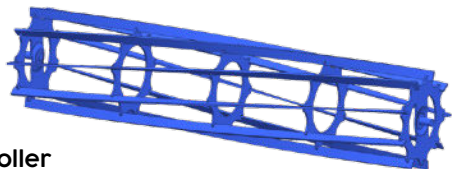

ROLNEC roll Ø 500mm
 8 bars with 10 mm thick flange

27x10 flexible tooth
 Straight with share

ROTO-HERSE Ø 300mm roller
 9 bars with 10 mm thick flange

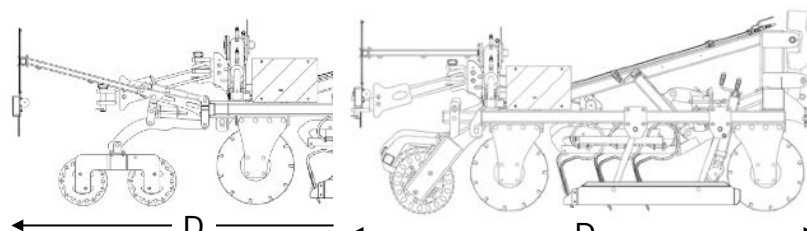

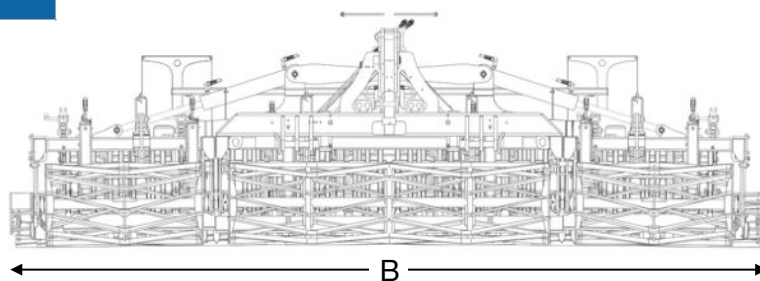

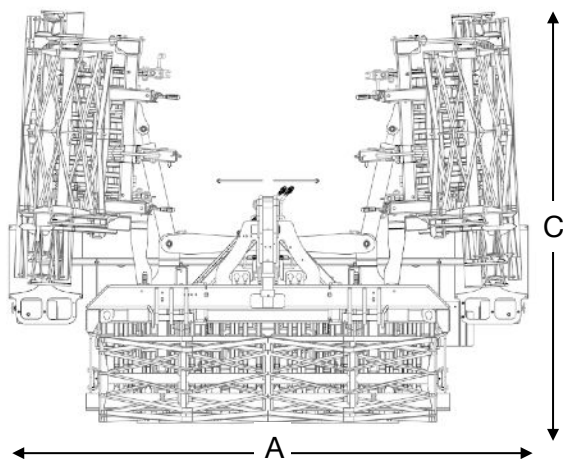

Disk ROLPAF

32x12 flexible tooth
 with crow's foot or straight ploughshare
